DETAILED ACTION

Response to Arguments

Applicant's arguments, see page 11 of remarks filed 10/18/2004, with respect to the Dion reference have been fully considered and are persuasive. The rejection of claims 1-3, 5, 7-15 has been withdrawn.

Allowable Subject Matter

Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art of Gokhfeld (US Patent 5,792,938) discloses a moisture measurement method using a humidity sensor, wherein the sensor response is measured at two different temperatures following a heating cycle, and the measurement value difference or slope of response function is directly used as the output signal of the device.

While Furubayashi et al. (US Patent 4,651,121) suggests similar "exceptional moisture sensors, having a moisture sensitive material ... which function as either an electrostatic capacitance-variation format sensor or a resistance-variation format sensor depending upon the range of humidity to be detected" the related prior art does not suggest using adsorption (or absorption, desorption) rate as a function of time rather than temperature to determine moisture of humidity.

Stormbom on the other hand discloses measuring sensor response as a function of time but during rather than following a heating cycle and the moisture is determined

as a function or result of the signal frequency spectrum analysis rather than simply the time rate of change.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles D. Garber whose telephone number is (571) 272-2194. The examiner can normally be reached on 6:30 a.m. to 3:00 p.m..
